

JRi Shocks was founded in 2007 by some of the most legendary innovators in motorsports and suspension with one goal in mind: to offer the most technologically advanced highest performance suspension systems in the world.

JRi is a company formed around the vision of Jeff Ryan. Jeff has been designing shock absorbers for over 30 years. He started his career working as an assembler for one of the original manufacturers of aftermarket shocks. Jeff's talents soon caught the eyes of Rick Galles and his driver, Al Unser Jr, which led to Jeff building custom suspension systems for Galles Racing. After several successful seasons, the Penske Organization hired Jeff to build shocks for its Indy Car teams, which led to opportunities in Formula One. The rest is history...

JRi Shocks is pleased to announce a special limited time offer to members of SV650.org on its suspension components. These components will be built for each person's individual motorcycle, and rider profile to make sure that the product is setup properly from the manufacture. Our SV650 shocks come in a variety of packages. The shocks are offered as a standard remote reservoir double adjustable shock, a remote reservoir triple adjustable shock, and if applicable a piggyback triple adjustable shock. These shocks are built to order for each customer and each shock has a serial number so we can pull up the records of the build and any service over the course of the shocks life time.

Double Adjustable Shock

360 degree hose swivel
High frequency response time
Compact light weight design
12mm ride height adjustable
Compression / Rebound adjustment

Retail \$985.00

SV650.org Price \$745.00

Triple Adjustable Shock

360 degree hose swivel
High frequency response time
Compact light weight design
12mm ride height adjustment
High & Low speed compression/ Rebound adjustment

Retail \$1,195.00

SV650.org Price \$895.00

Triple Adjustable Piggyback Shock

High frequency response time
Compact light weight design
12mm ride height adjustment
High & Low speed compression / rebound adjustment

Retail \$1,325.00

SV650.org Price \$985.00
